EARLY WESTERN TRAVELS
1748-1846

A SERIES of Annotated Reprints of some of the best and rarest contemporary volumes of travel, descriptive of the Aborigines and Social and Economic Conditions in the Middle and Far West, during the Period of Early American Settlement.

Edited with Historical, Geographical, Ethnological, and Bibliographical Notes, and Introductions and Index, by

Reuben Gold Thwaites, LL. D.

With facsimiles of the original title-pages, maps, portraits, views, etc. 31 volumes, large 8vo, cloth, uncut, gilt tops. Price $4.00 net per volume (except the Maximilien Atlas, which is $15.00 net). The edition is limited to 750 complete sets, each numbered and signed; but in addition thereto, a limited number of the volumes will be sold separately.

An Elaborate Analytical Index to the Whole

"This new series of historical and geographical works by the scholarly editor of 'The Jesuit Relations and Allied Documents,' promises to be particularly valuable and of more than usual popular interest. All the books are rare, some of them exceedingly so, no copy being found in the largest collections on this side of the Atlantic, or in many abroad. They are copiously explained and illustrated by introductions and notes, biographical sketches of the authors, bibliographical data, etc. The series should, of course, be in every public, collegiate, and institutional library, to say nothing of private collections of respectable rank. The works included naturally vary in literary merit and attractiveness, but many of them will compare favorably with the better class of modern books of travel, while some are as fascinating as the best fiction."—The Critic.

Extracts from a few of the reviews

*American Historical Review:* "The books are handsomely bound and printed. The editing by Dr. Thwaites seems to have been done with his customary care and knowledge. There is no want of helpful annotations. The books therefore are likely to be of more real value than the early prints from which they are taken."

*The Independent:* "The editor's annotations make the present series worth possessing, even if one already owns the originals."

*The Literary Digest:* "It is next to impossible, at this late date, even to a well-endowed public library, to amass a considerable collection of these early travels, so essential to an adequate understanding of the life and manners of the aborigines, and the social and economic conditions in the middle and far West, during the period of early American settlement. The making of a judicious and competent selection of the best and rarest of these writings has become an inevitable requirement; and the patient company of historians, librarians, and scholars will be quick to congratulate each other that the great task has fallen to the hands of so well-equipped an editor as Dr. Thwaites, eminent as an authority on all questions pertaining to the exploration and development of our great Western domain."

*The Forum:* "A most helpful contribution to the study of the America of a century or so ago."

*The Athenæum:* "... A series of permanent historical value... It ought to find a place in every geographical or historical library."

*Public Opinion:* "The century that sets the bounds of this work is the most important and interesting in the history of the 'winning of the West';... it is comprehensive, and the materials at the disposal of the editor assure a collection that will be indispensable to every well-equipped public or private library."

*The Nation:* "A stately series, octavo in size, typographically very open and handsome. The annotations are abundant and highly valuable."

*The Dial:* "An undertaking of great interest to every student of Western history. Exhaustive notes and introductions are by Dr. Thwaites, the foremost authority on Western history, who is also to supply an elaborate analytical index, under one alphabet, to the complete series. This latter is an especially valuable feature, as almost all the rare originals are without indexes."
"We cannot thoroughly understand our own history, local or National, without some knowledge of these routes of trade and war."—The Outlook.

"The fruit not only of the study of original historical sources in documents found here and in England, but of patient and enthusiastic topographical studies, in the course of which every foot of these old historic highways has been traced and traversed."—The Living Age.

"The volumes already issued show Mr. Hulbert to be an earnest and enthusiastic student, and a reliable guide."—Out West.

"A look through these volumes shows most conclusively that a new source of history is being developed—a source which deals with the operation of the most effective causes influencing human affairs."—Iowa Journal of History and Politics.

"The successive volumes in the series may certainly be awaited with great interest, for they promise to deal with the most romantic phases of the awakening of America at the dawn of occidental civilization."—Boston Transcript.

"The publishers have done their part toward putting forth with proper dignity this important work. It is issued on handsome paper and is illustrated with many maps, diagrams, and old prints."—Chicago Evening Post.
AUDUBON'S WESTERN JOURNAL: 1849-1850

Being the MS. record of a trip from New York to Texas, and an overland journey through Mexico and Arizona to the gold-fields of California

By

JOHN W. AUDUBON

With biographical memoir by his daughter

MARIA R. AUDUBON

Edited by

FRANK HEYWOOD HODDER

Professor of American History, University of Kansas

With folded map, portrait, and original drawings

JOHN W. AUDUBON, son of the famous ornithologist, was a member of Colonel Webb's California Expedition which started from New York City for the gold-fields in February, 1849. The Journal consists of careful notes which Audubon made en route. It was written with a view to publication, accompanied by a series of sketches made at intervals during the journey; but owing to Audubon's pre-occupation with other affairs, the plan of publication was never realized.

The Journal is, therefore, here published for the first time, and is illustrated by the author's original sketches, carefully reproduced. It gives a vivid first-hand picture of the difficulties of an overland journey to California, and of the excitements, dangers, and privations of life in the
gold-fields. An additional interest attaches to this account from the fact that Colonel Webb deserted his party, which consisted of nearly a hundred men, when the expedition reached Roma, and the command then by unanimous choice of the party devolved upon Audubon. This situation, as modestly related by the author, displays his sympathetic nature, as well as his keenness and ability as a leader.

Besides being a fascinating story of adventure, the Journal throws much light on the interesting years immediately following the discovery of gold in California. John W. Audubon was (with his brother Victor G. Audubon) the assistant of his father, and executed much of the artistic work on the famous “Quadrupeds of North America.” His pictures of the spreading of the gold craze in the East, the journey through Mexico, and the social conditions after reaching California, show him to be a keen and faithful observer.

The Editor, Professor F. H. Hodder, of the University of Kansas, has supplied complete annotation explaining matters of topography, natural science, and historical and personal allusions. Professor Hodder in his editorial work has drawn liberally upon his special knowledge of the history and geography of the West and Southwest. A biographical memoir has been written by Miss Maria R. Audubon. Being the daughter of the author, she has availed herself of a large amount of auxiliary material not accessible to any other biographer.

Printed direct from type on Dickinson’s deckle-edged paper, and illustrated with folded map, portrait, and plates, in one volume, 8vo, about 225 pages, cloth, uncut.

Price $3.00 net.
